

WONG SEE SIANG, JORDAN

(+65) 9048 1857 | Full Time | jorwong5@gmail.com | [linkedin.com/in/jorwong](https://www.linkedin.com/in/jorwong) | github.com/jorwong

EDUCATION

National University of Singapore (NUS)

Aug 2022 – Dec 2025

Bachelor of Computing in Information Systems (Honours, Distinction) - GPA: 4.32 / 5.00

Singapore

TECHNICAL SKILLS

Languages: Python, Go, Java, JavaScript, Bash, SQL (MySQL)

Frameworks & Systems: Spring Boot, React, Node.js, REST API, Apache Kafka, Apache Spark, Microservices

DevOps and Cloud: Docker, Kubernetes, AWS, GCP, Terraform, CI/CD, GitLab CI/CD, Jenkins, Ansible

Certificates: AWS Solutions Architect - Associate | SAA

PROFESSIONAL EXPERIENCE

Software Engineer Intern

Aug 2025 – Dec 2025

PayPal

Singapore

Tech Stack: Node.js, Javascript, React, Java, Python, Spark, Docker, GCP, BigQuery

- **End-to-End Data Pipeline:** Took full ownership of designing and deploying a Spark-based migration pipeline to consolidate legacy account data into a modernized database; architected automated data flows and cloud storage schemas (GCS), achieving 100% data integrity across millions of records.
- **Embedded Payments Platform:** Built Embedded Path end-to-end, enabling partner platforms to onboard, manage, and support merchants directly within their own systems — simplifying a previously fragmented workflow into a unified integration.
- **Self-Service Tooling:** Redesigned core business tools to eliminate engineering bottlenecks, giving teams self-service page creation capabilities and reducing operational complexity.

Software Engineer Intern

Jun 2025 – Aug 2025

JPMorgan Chase

Singapore

Tech Stack: Python, Jupyter Notebook, SIEM

- **Cyber Operations:** Contributed to cyber operations by conducting attack analysis and protecting JPMorgan Chase's systems from potential threats. Collaborated with cross-functional teams to enhance security measures.
- **Threat Detection Tooling:** Optimized threat detection tools by improving Jupyter Notebook performance and building custom widgets, streamlining the cyber operations workflow and increasing analyst efficiency.
- **Cross-Region Dashboard:** Collaborated with UK counterparts to develop a SIEM dashboard for conducting impact analysis when a URL is blocked, serving global security operations.

DevOps Engineer Intern - Citizen Disbursement System

May 2024 – Feb 2025

GovTech

Singapore

Tech Stack: Spring Boot, Python, Terraform, AWS, Kubernetes, Apache Kafka, Docker, Java, JavaScript, HTML, CSS

- **Microservices at Scale:** Developed and optimized microservices using Spring Boot, Apache Kafka, and Docker, serving government payouts for 4 million citizens with end-to-end ownership from design to production deployment on Kubernetes.
- **Reusable Component Library:** Designed 5+ reusable web components for internal tools, simplifying frontend development across teams and reducing duplicated effort by 20%.
- **Pipeline Simplification:** Streamlined data pipelines by automating S3 file transfers via AWS Lambda, eliminating manual processing steps and reducing pipeline overhead by 30%.
- **File Processing Service:** Architected and deployed a file retrieval service on ECS, automating decryption and storage optimization end-to-end, reducing errors by 15% across 4M+ transactions.

PROJECTS & EXTRA CURRICULAR

LazyKafka | Go, Kafka, Docker, Tview

Present

- Built a TUI from scratch in Go for real-time Kafka administration — visualizes message streams, manages topics (create/delete/offset), and monitors partition health. Designed for simplicity over heavier GUI tools.

HealthPal | Python, MongoDB, Docker, Java, React, JavaScript

May 2024

- Full-stack web app integrating LLMs to predict diseases from user-reported symptoms, recommend medications, and locate nearby pharmacies with real-time availability.
